 Embu, Kenya

Career Objective

Seeking a Software Developer Internship or Industrial Attachment opportunity where I can apply my knowledge of full-stack development, contribute to real-world projects, and gain hands-on industry experience. Eager to grow under professional mentorship while delivering efficient and scalable software solutions.

Work Experience

- Collaborated with small companies on web and software development projects.
- Assisted in feature implementation, testing, debugging, and deployment.
- Worked within team environments using version control and structured workflows.

Education

2027 **Bachelor of Science in Computer Science, University of Embu**
Kenya Expected Graduation: 2027

Additional Information

English

Swahili

Availability

Internship or Industrial Attachment (On-site or Remote)

Technical Projects

Online Marketplace for Writers and Students

Designed and developed a web-based platform connecting students with academic writers. Implemented authentication, bidding system, and secure transaction workflows.

Betting Platform Web Application

Developed a full-stack application providing football fixtures, statistics, and predictions with backend integration and payment access control.

Digital Restaurant QR Code System

Built a QR-based digital menu and ordering system with backend order management and dynamic content updates.
